Enthusiastic and dedicated Computer Engineering student with a strong foundation in programming and software development. Passionate about technology and eager to apply academic knowledge to real-world challenges. Known for problem-solving skills, attention to detail, and the ability to quickly learn and adapt to new tools and technologies.

EXPERIENCE

Frontend Internship

Lalitpur

NTC

Jun, 2025 - Jul, 2025

- Built and integrated React-based frontend interfaces with n8n automation workflows to deliver end-to-end solutions for social media scheduling, posting automation, and cross-platform content management.
- Developed data collection pipelines using n8n's webhook and API nodes connected to React dashboards, enabling real-time visualization and management of aggregated data from multiple sources.
- Collaborated on automating repetitive business workflows by connecting React UIs to n8n-triggered sequences, reducing manual effort across social media operations and structured data gathering tasks.

EDUCATION

Bachelors in Computer Engineering

Lalitpur

Sagarmatha Engineering College

Mar, 2021 - Aug, 2025

PROJECTS

MERN Chatapp

- Built a full-stack real-time chat application using MERN stack with Socket.io for instant messaging.
- Integrated Cloudinary to handle and store user-uploaded images and chat media securely.
- Used MongoDB Atlas for managing and storing chat data with high availability.
- Deployed both frontend and backend seamlessly on Render for full production-ready deployment.

<https://mern-chatapp-6pa7.onrender.com>

Location Sharing Web App

- Developed a full-stack MERN application that lets users add, update, delete, and view visited places on an interactive Google Map, with real-time updates and precise geolocation.
- Integrated Google Maps JavaScript API to display custom map markers and locations added by users, enabling a seamless and intuitive user experience.
- Secured user authentication using bcrypt for password hashing and MongoDB Atlas to store user data and place entries, ensuring data integrity and privacy.
- Deployed the application using Firebase Hosting for the frontend and Heroku for the backend, with RESTful APIs for backend communication and full CRUD functionality for managing locations.

Converso-SAAS App

- Built a full-stack SaaS AI tutoring platform where users create personalized learning companions with a custom name, subject, voice, and personality, enabling real-time voice-based educational conversations powered by the Vapi AI SDK.
- Integrated end-to-end authentication and data persistence using Clerk for user session management and Supabase as the backend database, enabling per-user session history tracking, companion bookmarking, and a personal learning journey dashboard.
- Developed a modular, component-driven UI with Next.js 15 App Router, Radix UI primitives, Tailwind CSS, and React Hook Form with Zod validation, delivering a responsive and accessible interface for browsing, creating, and launching lesson sessions.
- Implemented production-grade observability and error monitoring via Sentry (server, client, and edge configurations), and deployed the application to Vercel with Turbopack-powered builds for optimized performance.

Virtual Outfit Tryon

- Developed an AI-based virtual outfit try-on system for previewing outfits before purchase.
- Applied ML techniques like cloth mask generation, pose estimation, and ATR-based body segmentation for accuracy.
- Implemented GMM for realistic cloth warping and alias generation, ensuring natural alignment and appearance.
- Integrated the full pipeline into a responsive Next.js web app for smooth and real-time user experience.

The Wild Oasis

- Developed an interactive hotel booking platform with real-time room availability and reservation management
- Enabled users to add, delete, edit, or duplicate cabin options effortlessly for personalized stays
- Improved booking functionality with check-in, check-out, and reservation deletion options for a seamless experience
- Integrated user account creation, login, and profile management, allowing users to update credentials securely and easily

ACHIEVEMENTS

Hackathon Participation

- Participated in the COESIS Hackday 2022, developing a water reminder app, which was recognized for innovation.

SKILLS

HTML, CSS, Javascript, React JS, MERN Stack, C,C++ python, MySQL, Python & Django Framework, Php, NextJs
